Step into the world
of technology
with TELTRAC.

TELTRAC

Why Teltrac.

- At Teltrac we are passionate about solving technology challenges for you.

- Understanding your requirements and then applying our in-depth knowledge across our technology and service portfolios, that's what it is about for us.

- Our dedicated and customer focused internal support team backs up our industry leading design, consultancy and project management.

- Our highly trained and talented technical expertise implement 'fit for purpose' technology and service solutions.

- We aim at delivering prompt and professional service and support that exceeds your expectations.

- We provide a single point of contact to you for the whole of New Zealand.

- Structured Cabling Systems
- Wireless Implementation

TELTRAC

Sustainability.

- Teltrac is committed to working sustainably where possible. This includes travel carbon credits, utilising a paperless job management system, using compostable café and catering supplies and the environmental recycling of electronic equipment with RemarkIt and e-Cycle.

- When working on any job, we ensure that the environmental recycling of electronic equipment and other recyclable items such as cardboard and data cabling is completed where possible. This starts with our design services to ensure we accurately measure installed infrastructure to result in minimised waste.

- Every job is allocated a Project Manager; their responsibility is to ensure we're minimising waste and environmental impact along with using technology to minimise paper waste. Any excess wastage is recycled in the appropriate manner either on site, at our premises, or through our third party recycling partners Remarkit and e-Cycle.

TELTRAC

Health & Safety.

+IMPAC PREQUAL

Prequal is an independent health and safety assessor that looks at a company's health and safety policies and procedures as well as how these are implemented in the field over previous years. A score is then given in the form of a star rating.
Companies that use this standard include:

TELTRAC

Partners.

Teltrac are proud to be partners with strategic manufacturers across our capabilities.

Teltrac are one of New Zealand's only Commscope Elite Partners and the only ImVision AIM Partner in New Zealand.

Teltrac also has strong Panduit and Corning skills.

Teltrac specialises in Audio Visual and security.
